

Flexible classroom response with Poll Everywhere

Proven to enhance student achievement with fast, accessible, mobile-phone response tools.

Adapts to each instructor's classroom size, pedagogy, and teaching style with lightweight setup, seamless slideware integration, and three ways to participate: SMS text, web browser, and mobile app.

Deploys campus-wide with LMS integration, no extra hardware, and a roll-out and ongoing engagement plan delivered by a professional support team and an executive account manager.

Software that disappears into the classroom

- Pedagogy-agnostic– suits any assessment or interaction style
- Select full student registration, guest participation, or anonymity
- Works natively in the instructor's presentation platform
- Collaborate with fellow instructors on team accounts
- Light on wifi and data requirements
- Scales from small seminars to the largest campus events

82% of instructors report increased student engagement

Anglia Ruskin University

Deeper inquiry and reduced cheating

Clicker response systems invite swapping and sharing of devices. Photos on social media show students holding nine clickers at a time to falsify attendance and responses. Systems like Poll Everywhere use student-owned devices—mobile phones and laptops, which students are less willing to share. These more powerful devices enable a broader range of question types, including open-ended and image-based questions, while Poll Everywhere anti-cheating features minimize false participation.

Flexibility at every level

Poll Everywhere is native to the internet, so it works anywhere the instructor goes. It syncs with the five most-used learning management systems, and the top three presentation platforms. It is equally useful in the classroom as it is at campus-wide orientation and sporting events. It enables sensitive discussion in small classrooms, and scalable participation in large lecture halls. It goes from multiple choice assessment to live, Reddit-style discussions. And it does all of this at little to no cost for the student.

Over 300k educators use Poll Everywhere, including
